## Key Takeaways

### What can AI do for your Small Firm?

AI can free up time and energy for more creative work, while helping small-margin businesses become more profitable.

### What are the risks of not adopting AI in your workflow?

Firms risk losing their competitive advantage to peers who are already experimenting with and implementing AI in their processes.

### What to watch out for?

Key concerns include:

- » Intellectual property and copyright violations
- » Hallucinations and unpredictability
- » Lack of explainability
- » Privacy risks
- » Professional liability concerns

### What is the AIA doing about AI in the Small Firm?

The Strategic Council is developing small firm resources and working with the AIA AI Task Force to prepare:

- » Small Firm Toolkits
- » Symposiums
- » Specialized courses

These are expected to launch in late 2025 / early 2026.
